

# A Cadre of Experts: An LSAT Novel

More than anything, Alexandra wants to conquer the LSAT and go to law school. Will she succeed? Alexandra is an average girl: She doesn't possess any superpowers that will help her on the LSAT, nor does she come from a long line of lawyers. But with Noah, a successful attorney and former LSAT instructor at her side, along with Noah's expert friends and Alexandra's relentless tenacity and laser-focused study, this unique educational fiction tells the story of Alexandra's path to LSAT success, a path that you too can follow. Ripe with relatable tension and a sprinkle of humor, *A Cadre of Experts* thoroughly details essential LSAT concepts and exam strategies, all told through the growing friendship between Alexandra and Noah as they travel the country to consult with various experts in preparation for the exam. We are witness to the emotional rollercoaster that Alexandra rides, sharing the emotional highs of over-confidence and the lows of discouragement - and we see who she is when her journey is over. Develop an invaluable mindset that will set you on the path to emotional and intellectual growth for and beyond the test.
