

Human Traces (Vintage International)

Sixteen-year-old Jacques Rebiere is living a humble life in rural France, studying butterflies and frogs by candlelight in his bedroom. Across the Channel, in England, the playful Thomas Midwinter, also sixteen, is enjoying a life of ease-and is resigned to follow his fathers wishes and pursue a career in medicine. A fateful seaside meeting four years later sets the two young men on a profound course of friendship and discovery; they will become pioneers in the burgeoning field of psychiatry. But when a female patient at the doctors Austrian sanatorium becomes dangerously ill, the two mens conflicting diagnosis threatens to divide them--and to undermine all their professional achievements. From the bestselling author of *Birdsong* comes this masterful novel that ventures to answer challenging questions of consciousness and science, and what it means to be human.
