In a near-future new age of corporate control, hacker mercenaries, and electronic terrorism, a public relations executive on the rise finds herself caught in the violent epicenter of a data war Two decades into the twenty-first century, the worlds nations are becoming irrelevant. Corporations are the true global powers, with information the most valuable currency, while the smaller island nations have become sanctuaries for data pirates and terrorists. A globe-trotting PR executive for the large corporate economic democracy Rizome Industries Group, Laura Webster is present when a foreign representative is assassinated on Rizome soil during a conference for offshore data havens. Dispatched immediately on an international mission of diplomacy, Laura hopes she can make a difference in a volatile, unsteady world, but instead finds herself trapped on the front lines of rapidly escalating third-world hostilities and caught up in an inescapable net of conspiracy, terrorism, post-millennial voodoo, and electronic warfare. During the 1980s, science fiction luminary Bruce Sterling envisioned the future ... and hit it almost dead-on.
