From his triumphant debut with *Snow Crash* to the stunning success of his latest novel, *Quicksilver*, Neal Stephenson has quickly become the voice of a generation. In this now-classic thriller, he and fellow author J. Frederick George tell a shocking tale with an all-too plausible premise. There's no way William A. Cozzano can lose the upcoming presidential election. He's a likable midwestern governor with one insidious advantage provided by a shadowy group of backers. A biochip implanted in his head hardwires him to a computerized polling system. The mood of the electorate is channeled directly into his brain. Forget issues. Forget policy. Cozzano is more than the perfect candidate. He has a special effect. Complex, entertaining, frequently funny. Publishers Weekly qualifies as the sleeper of the year, the rare kind of science-fiction thriller that evokes genuine laughter while simultaneously keeping the level of suspense cranked to the max.
