

Greetings from Saudi Arabia

What's it like trying to live and love in a culture whose goal is to keep men and women apart? This fact-based account describes the trials of a young American professor, who is thrust into Saudi high society. She's come to help set up the first specialty clinic of its kind in the country, but hadn't counted on the ever-present danger, or charges of breaking the laws and being sent before an Arab council of men for judgment. No matter how wealthy or well-connected a woman might be, she still faces constant harassment, limited power over her life, and blame for situations beyond her control. The women in this story include Americans, Saudis, Brits, Egyptians, Lebanese and Filipinos. They're all trying to cope with men and each other within the confines of a seriously restrictive society, while struggling for their freedom. Even with the serious message of this book, the story is told with a gentle humor, making it both thought-provoking and entertaining.
