

Starborn: A Mystical Tale

Edward Doolittle forgets to shut down his memory banks and is born with complete past-life recall, along with all his paranormal powers intact. As a cosmic dropout, this proves tiring until he is discovered by a child psychologist, Dr. Abigail Peterson, who wants to enlist him in her campaign to subjugate the world. A freewheeling melange of esoteric themes ... makes this wry little story of metaphysical intrigue one that will appeal to the sophisticated child and the childlike sophisticate. *New Age Journal*
